

Vision numeric France expands its TYPE3 distribution network in China with N°1 Business Partner for CATIA PLM JiangDa Technology Development Ltd

Partnership is answering the industry's growing requirement to offer a comprehensive solution to create and incorporate text and graphics, directly in CATIA V5.

February 2010, FRANCE : Vision numeric France, a world leading software solution provider in the field of CAD / CAM engraving and a CAAV5 software partner of Dassault Systèmes since 2003, is announcing today the reinforcement of its partnership with JiangDa Technology Development Ltd, the leading 3D CAD Technology Company and largest Value Added Reseller (VAR) of Dassault Systèmes PLM solutions in China.

"The partnership with JiangDa Technology Development Ltd is an integral part of our global strategy for our TYPE3 product portfolio. Because performance, stability and reliability of data are essential, CATIA customers deserve a solution that matches the expectations they have for such advanced PLM solution as CATIA V5." states Maxime Kerault, Vision numeric Asia Business Manager. "Our add-on TYPE3 CAAV5 Based, fully integrated in CATIA V5, answers the need of the ever-increasing industry requirement for early integration of text, logo and graphics in the PLM process."

"The integration of TYPE3 CAAV5 based within our CATIA portfolio will enable us to complete our PLM offering with a professional solution. Today engraving is everywhere: Automotive, E&E, Consumer Goods or electrical equipments. This a good opportunity to stay one step ahead and follow 3DS partner's strategy to offer a complete solution to existing and prospective customers !" states Song Yun, General Manager of JiangDa Technology Development Ltd. "It represents also a unique opportunity to offer additional solutions to our existing customer base, thus optimising revenue opportunities, and adding competitive differentiation"

TYPE3 CAAV5 Based is the professional solution for text and graphics creation and modification in CATIA V5. Users are able to quickly and easily integrate text, company logos, model & serial numbers, graphic elements, symbols or part identification earlier in the design process for simulation, validation and production purposes. With TYPE3 CAAV5 Based, Vision numeric is able to provide a sustainable solution improving not only the data management in the PLM process, but also the communication process between designers and engineers. Today, more than 45 000 licences worldwide benefit from immediate productivity gains and a rapid ROI thanks to the TYPE3 solutions.
