

The **World Fair for Moldmaking and Tooling, Design and Application Development** takes place for the 15th time at the Exhibition Fair Ground, Frankfurt in Germany, from December 3-6, 2008.

Vision numeric held a **technological pole** during the exhibition and welcomed many, many visitors and prospects. Mainly from **Germany** but also from other **European countries**, interest was very strong for the four solutions our team presented.

Vision numeric introduced the latest versions of its solutions. *Cutting edge technology combined with flexible and customized solutions guarantee productivity gains and improved quality.*

**Euromold** was the opportunity to benefit from **exclusive exhibition offers** on upgrades, training and maintenance contract.

**Definitely an innovative concept, Euromold represents a whole process chain "From Design to Prototyping to Series Production".** A unique fair concept that closes the gap between industrial designers, product developers, producers, suppliers, and end-users. **EuroMold** shows methods for a quicker, more economical, and more efficient development and production of new products - a factor of increasing importance within the demands of the modern economy.
