

Visit DAESUNG at Jewel Fair Korea 2006
June 29 ~ July 2, 2006
Atlantic & Convention Hall, COEX

Technical and sales teams from Vision numeric welcomed visitors on our partner's booth: DAESUNG during the Jewel Fair Korea 2006.

Jewel Fair Korea was an opportunity to promote our **3DESIGN** product in this country. This show is an "UFI-approved" trade show and the only international jewellery and watch show that is held in Republic of Korea. This year, 345 exhibitors from 19 countries were pleased with the level and quality of the show. Over 24 000 visitors from 47 different countries were satisfied with the amount of business and networking conducted during the show period.

Once again our **3DESIGN** solution encountered great success among visitors. Whether they were retailers, designers, manufacturers, etc. they could all find a solution to *answer their specific needs* with 3DESIGN; all professionals of the jewellery industry had their expectations satisfied.

Jewellery Fair Korea was yet another occasion to hear feedback from new users present at the show. **3DESIGN** is clearly an intuitive and easy to use solution. "Its interface and ergonomic icons make it easy to access and you learn quickly" explains a new Korean user on the stand. The success encountered at the fair definitely encourages us to come back next year.
