Paris Expo, Porte de Versailles - 20-21-22 Sept.2006

Vision numeric and type3 product family at visual communication EUROPE 2006

www.type3.com

Visual Communication Europe 2006 has confirmed its position as a leading world trade fair for the visual communication industry. This trade show was considered dynamic by both exhibitors and visitors, with content, demonstrations and activities.

The trade show attracted more than 12,000 specialists.

With 22 countries represented, 68 new brands, 244 exhibitors and an exhibition covering more than 18,000 m² ... this year once again the trade show brought together all the techniques and products available in the field of visual communication.

Our team presented TYPE3 product family and in particular:

- **TYPEEDIT :** CAD-CAM solution for NC machines (2D, 2,5 D et 3D)

- **LASERTYPE** dedicated to laser machines.

Our visitors were mainly customers, machines partners and companies who are looking for innovative solutions to increase their business in the sign industry.

A lot of TypeEdit and LaserType demos were requested. Our team could notice a growing demand for the laser domain
