CNR EXPO

10th INTERNATIONAL METAL WORKING TECHNOLOGIES EXHIBITION

21 - 26 September 2004

Türkçe

The International Metalworking Technologies Exhibition TATEF 2004 is among the five largest fairs in the world in metalworking sector. It is the opportunity for local and foreign companies to reach international markets and business partners.

In a matter of days, 3B Dizayn recorded hundreds of contacts. The crowd attending the show was at a record high this year. Visitors mainly came from Turkey and other neighbor countries. Most of them were eager to find good partners and conclude business deals.

3B Dizayn ended the show very pleased with the number and qualification of contacts. 3DESIGN literally amazed visitors by its looks, ergonomics and powerful yet easy-to-use parametric capabilities.

See you there in 2006 for sure!

TATEF International Metal Working Technologies Exhibition, September 21-26th 2004, Turkey
