

**Vincenza Oro January 16<sup>th</sup>-23<sup>rd</sup> 2005**

Our official subsidiary in Italy: **Vision numeric Italia** (VNIt) held an attractive booth at Vincenza Oro. A delegation from our headquarters came along to support our subsidiary's efforts at this mandatory European show.

For more information about **our Italian subsidiary**, please visit: [www.type3.it](http://www.type3.it) and feel free to contact them directly at: [info@type3.it](mailto:info@type3.it)

This 2005 edition welcomed an impressive number of visitors from eastern countries (Hungary, Tcheq Republic, etc.) as well as the more traditional European, Asian and Indian visitors. Our team encountered a huge success in presenting 3DESIGN, the ultimate software solution for jewelry design.

Many machine manufacturers and jewelry designers asked for customized demos of 3DESIGN. The ability to create in 3D instantly impressed them the most. All of them appreciated the Parametric construction tree next, the software's overall ergonomony, the new free creation, etc.

As usual during the Vincenza show, our solutions' capabilities and ease-of-use impressed and seduced many visitors. As a result, be sure to find us there again next year!
