

Vision numeric UK and  
Type3 solutions @  
Spring Fair 5-9 Feb. 2006  
on stand P50, Hall 17

## SpringFair 2006 Edition > a tremendous show!

---

Vision numeric UK was exhibiting like every year at **SpringFair** at the Birmingham NEC. All the software solutions from the Type3 product family were presented:

- **TypeEdit Jewel** for 2D, 2.5D and 3D manufacturing
- **LaserType** for laser machines
- **3DESIGN**, the 3D jewellery dedicated software.

Once again **3DESIGN** met a great success among visitors. Whether they were retailers, designers, manufacturers, teachers, etc. they could all find a solution to *answer their specific needs from easy and parametric creation to realistic rendering pictures*; all professionals of the jewellery industry had their expectations satisfied.

Moreover a *special offer* was launched during the show which allows those professionals to finance their project progressively and even pay less in the end as they benefit from "Tax Relief"!

This 3-year finance program includes:

- **3DESIGN** software
- 3 updated versions
- a 3-year maintenance contract
- and 5 days of training

and adapts to all jewellery professional investment projects. Many visitors could see both the quality of the software and the interest in this *financing system* and made up their mind straight on the stand!

For those who missed it, do not worry you can collect more information with:
